

Index

1. Resistivity measurement of a Germanium sample via 2-probe
2. Van der Pauw Resistivity Measurements of Germanium sample
3. Ambient Resistance vs Temperature experiment for a Germanium sample using a four-probe configuration
4. Cryogenic Resistance vs. Temperature experiment for a Germanium sample using a two-probe configuration
5. Thermal Vapour Deposition (TVD) of aluminium (Al) on glass substrate
6. Measurement of Aluminum Thin Film Thickness using Field Emission Scanning Electron Microscopy (FESEM)
7. Resistivity measurement of an Aluminium thin film in linear geometry (2-probe & 4-probe)
8. Van der Pauw Resistivity Measurements of Aluminium Thin Films
9. Fabrication of Aluminum Hall Contacts using Photolithography
10. Hall Effect and Magnetoresistance Measurement of an Aluminum H-Bar
